Scoala Gimnaziala Valisoara (PIC: 941421570 Valisoara 199 – 337520 Romania)

21st Nov

Welcoming at the airport

The project teams are welcomed at the airport. Due to the pandemic restrictions all the participants are accommodated in the hotel near the airport and the school. Each team was sent the programme of the mobility activities with the expenses list before the arrival.

Thanks to the help of the school community the host school organized various transport options, additional meals and activities for the students and the teachers free of charge to help to balance the overall cost of the mobility.

22nd Nov /Monday/

9:00 - Arriving at school

9:15 - Welcoming at school

9:30 - Team presentation- short info about the participants and the school;
10:00 - Let's learn some Polish 😊
10:45 - Ice breakers & tour around the school (mixed nationality teams)
11:50 - ECO lessons & workshops
13:00 - lunch (you are invited)
13:30 - Small talk break / project team meeting for teachers
14:00 - Meeting with a representative of EuroBaltic Region
16:00 - students spend their evening with Polish partners
/ project team meeting for teachers

Each team gives a short presentation about their school and country and the eco activities done so far. During the tour around the school the participants learn about the school organization, they can see the eco exhibition prepared by the kids and meet the local community. During the workshops the students learn about ecology and produce decorations from old materials and clothes. They learn how to reuse instead of throw away unwanted things. The activities emphasize the problem of overconsumption and rubbish overproduction.

The lecture prepared by the representative of the Euro Baltic Region organization promotes the idea of Erasmus projects and international cooperation. Our guests learn about the Baltic Sea ecosystem and the eco threats in the Baltic region as well as the value of solving problems together.

23rd Nov /Tuesday/

Around 8:00 - train to Gdynia
9:00 - Gdynia (Experiment- science centre)
12:30 - meeting with the representatives of the City Council
13:30 - lunch (Pyra Bar)
Visiting Gdańsk City Centre

The trip to the Experiment Centre focuses on the scientific approach to the eco problems and the necessity to study chemistry and physics in order to be able to understand the world around us. It shows that the theory we learn at school is related with the real life problems.

The visit to the Gdańsk City Council promotes the project in the region. The Gdańsk City Council representatives prepared a presentation about the city campaign "Gdańsk without plastic" and the description of 10 principles on how to be more environmentally friendly. At the end there was an open discussion about the eco initiatives taken in different countries and their results. Each participant received some eco gifts from the City of Gdańsk. The students had a chance to meet the local authorities and to try their translation skills and public speaking.

24th Nov /Wednesday/

7:30 - meeting at school - coach trip to Malbork
9:00 - Malbork castle
12:30 - lunch (Wyczechowo-Hilary)
14:00 - Szymbark – upside down house in the Kaszubian Province
17:00 - back to school
- students spend their evening with Polish partners
Teachers' meeting

A culture trip to local attractions including Malbork, the world's largest brick castle in the world located by the Vistula River and the Kaszubian Province, a great natural asset of the region. The forest complexes of the Kashubian Landscape Park containing and protecting unique flora and fauna are a real live lesson proving how important it is to value the nature around us. The Szymbark folk museum shows traditional ways of living in accordance with the laws of nature.

25th Nov /Thursday/

9:00 - Sightseeing Gdańsk + a city game
12:00 - lunch (Familijny-Kos)
13:30 - WWII Museum Gdańsk
16:00 - Free time / Forum Shopping Mall

The teams were exploring the city attractions and took part in the City Game. The tour round the Second World War Museum was one of the most important history lessons proving how easy it is to destroy everything around us. The weapon used in wars, the chemical substances, the bombardments cause irreparable damages to the societies and nature.

Cooperation, respect, peace and harmony are the key elements to protect the beauty of our world.

26th Nov /Friday/ ERASMUS+ Day / St. Andrew's Day

10:00 - meeting at school
10:15 -11:00 living sculptures
11:00 - 13:00 St. Andrew's fortune-telling / project team meeting for teachers
13:00 - lunch at school (you are invited)
13:30 - evaluation of the week: teams summarize the activities and present the videos & photos
14:00 - traditional dances / Belgian dance
16:00 - students spend their evening with Polish partners
Teachers' evening meeting

Culture presentations and games help to understand and respect each other. The teams also learned how to prepare a movie from the materials collected during the week and the final product was presented to the local public. The host school prepared the Quizzes competition about the region. During the teachers' project meetings we discussed the problems connected with the Covid restrictions, the dates of the next mobilities and the common website. The final day was the summary of the project activities and a wonderful chance to socialise.

27th Nov /Saturday/

Farewell at the airport

The final remarks:

Due to Covid restrictions organizing the mobility was a real challenge. Some activities had to be changed or modified.

The Romanian partners joined the mobility online. They presented their eco activities to all the participants via the online connection. The activities which took place outside the school were broadcast by 2 Polish students via their phones for the Romanian students and teachers. Additionally, the Polish school shared video materials, links and quizzes for extra practice.
