Fabric Scrap Flowers

Materials

- fabric scraps or old T-shirts
- wooden sticks
- hot glue
- scissors

How to Make Them

1. Cut the fabric into strips about 5–8 cm (2–3 in) wide.
2. Roll or gently twist each strip to create the flower petals.
3. Wrap the fabric around the end of a stick, shaping it into a flower.
4. Secure each layer with hot glue as you go.
5. Finish by gluing the end of the fabric firmly in place to keep the flower from unravelling.
6. Make several flowers using different colors and combine them into a cheerful bouquet.
